A BILL TO BE ENTITLED

AN ACT REQUIRING MUNICIPALITIES AND MEMBERSHIP CORPORATIONS ORGANIZED UNDER CHAPTER 117 OF THE GENERAL STATUTES TO PERMIT COMMUNICATIONS SERVICE PROVIDERS TO USE THEIR POLES, DUCTS, AND CONDUITS FOR ATTACHMENTS AND RELATED USES, AND AUTHORIZING THE NORTH CAROLINA BUSINESS COURT TO CONSIDER AND RESOLVE DISPUTES CONCERNING THE RATES, TERMS, AND CONDITIONS ASSOCIATED WITH THE USE.

The General Assembly of North Carolina enacts:

**SECTION 1.** Article 3 of Chapter 62 of the General Statutes is amended by adding a new section to read:

**"§ 62-55. Regulation of pole attachments.**

(a) A municipality, or a membership corporation organized under Chapter 117 of the General Statutes, that owns or controls poles, ducts, or conduits shall allow any communications service provider to utilize its poles, ducts, and conduits at just, reasonable, and nondiscriminatory rates, terms, and conditions adopted pursuant to negotiated or adjudicated agreements. A request to utilize poles, ducts, or conduits under this section may be denied only if there is insufficient capacity or for reasons of safety, reliability, and generally applicable engineering principles, and those limitations cannot be remedied by rearranging, expanding, or otherwise reengineering the facilities at the reasonable and actual cost of the municipality or membership corporation to be reimbursed by the communications service provider. In granting a request under this section, a municipality or membership corporation shall require the requesting entity to comply with applicable safety requirements, including the National Electrical Safety Code and the applicable rules and regulations issued by the Occupational Safety and Health Administration.

(b) Following receipt of a request from a communications service provider, a municipality or membership corporation shall negotiate concerning the rates, terms, and conditions for the use of or attachment to the poles, ducts, or conduits that it owns or controls. Following a request from a party to an existing agreement made pursuant to the terms of the agreement or made within 120 days prior to or following the end of the term of the agreement, the communications service provider and the municipality or membership corporation which is a party to that agreement shall negotiate concerning the rates, terms, and conditions for the continued use of or attachment to the poles, ducts, or conduits owned or controlled by one of the parties to the agreement. The negotiations shall include matters customary to such negotiations, including a fair and reasonable rate for use of facilities, indemnification by the

1 attaching entity for losses caused in connection with the attachments, and the removal,  
2 replacement, or repair of installed facilities for safety reasons. Upon request, a party shall state  
3 in writing its objections to any proposed rate, terms, and conditions of the other party.

4 (c) In the event the parties are unable to reach an agreement within 90 days of a request  
5 to negotiate pursuant to subsection (b) of this section, or if either party believes in good faith  
6 that an impasse has been reached prior to the expiration of the 90-day period, either party may  
7 bring an action in Business Court in accordance with the procedures for a mandatory business  
8 case set forth in G.S. 7A-45.4, and the Business Court shall have exclusive jurisdiction over  
9 such actions. The parties shall identify with specificity in their respective pleadings the issues  
10 in dispute, and the Business Court shall (i) establish a procedural schedule which, unless  
11 otherwise agreed by the parties, is intended to resolve the action within a time period not to  
12 exceed 180 days of the commencement of the action, (ii) resolve any dispute identified in the  
13 pleadings consistent with the public interest and necessity so as to derive just and reasonable  
14 rates, terms, and conditions, taking into consideration and applying such other factors or  
15 evidence that may be presented by a party, including without limitation the rules and  
16 regulations applicable to attachments by each type of communications service provider under  
17 section 224 of the Communications Act of 1934, as amended, and (iii) apply any new rate  
18 adopted as a result of the action retroactively to the date immediately following the expiration  
19 of the 90-day negotiating period or initiation of the lawsuit, whichever is earlier. If the new rate  
20 is for the continuation of an existing agreement, the new rate shall apply retroactively to the  
21 date immediately following the end of the existing agreement. Prior to commencing any action  
22 under this subsection, a party must pay any undisputed fees related to the use of poles, ducts, or  
23 conduits which are due and owing under a preexisting agreement with the municipality or  
24 membership corporation. In any action brought under this subsection, the court may resolve  
25 any existing disputes regarding fees alleged to be owing under a preexisting agreement or  
26 regarding safety compliance arising under subsection (d) of this section. The provisions of this  
27 section do not apply to an entity whose poles, ducts, and conduits are subject to regulation  
28 under section 224 of the Communications Act of 1934, as amended.

29 (d) In the absence of an agreement between an attaching party and the involved  
30 municipality or membership corporation that provides otherwise, the following shall apply:

31 (1) When the lines, equipment, or attachments of a communications service  
32 provider that are attached to the poles, ducts, or conduits of a municipality or  
33 membership corporation do not comply with applicable safety rules and  
34 regulations set forth in subsection (a) of this section, the municipality or  
35 membership corporation may provide written notice of the noncompliant  
36 lines, equipment, or attachments, and make demand that the communications  
37 service provider bring such lines, equipment, and attachments into  
38 compliance with the specified safety rules and regulations. Within the  
39 60-day period following the date of the notice and demand, the  
40 communications service provider shall either contest the notice of  
41 noncompliance in writing or bring its lines, equipment, and attachments into  
42 compliance with the specified applicable safety rules and regulations. If the  
43 work required to bring the facilities into compliance is not reasonably  
44 capable of being completed within the 60-day period, the period for  
45 compliance shall be extended as may be deemed reasonable under the  
46 circumstances so long as the communications service provider promptly  
47 commences and diligently pursues within the 60-day period such actions as  
48 are reasonably necessary to cause the facilities to be brought into  
49 compliance.

50 (2) When the communications service provider or, if applicable, another  
51 responsible attaching party fails to bring any noncompliant lines,

1 equipment, or attachments into compliance (i) within the 60-day period  
2 following the date of notice and demand pursuant to subdivision (1) of this  
3 subsection, or (ii) within 120 days following the date of notice and demand  
4 when the period is extended pursuant to subdivision (1) of this subsection,  
5 the municipality or membership corporation shall be entitled to take such  
6 remedial actions as are reasonably necessary to bring the lines, equipment,  
7 and attachments of the communications service provider into compliance,  
8 including removal of the lines, equipment, or attachments should removal be  
9 required to achieve compliance with the applicable safety rules and  
10 regulations.

11 (3) A municipality or membership corporation that removes or brings into  
12 compliance the noncompliant lines, equipment, or attachments of a  
13 communications service provider pursuant to subdivision (2) of this  
14 subsection shall be entitled to recover its reasonable and actual costs for such  
15 activities from the communications service provider or other attaching party  
16 whose action or inaction caused the noncompliance, and the responsible  
17 attaching party shall reimburse the municipality or membership corporation  
18 within 45 days of being billed for such costs.

19 (4) All attaching parties shall work cooperatively to determine the causation of,  
20 and to effectuate any remedy for, noncompliant lines, equipment, and  
21 attachments. In the event of disputes under this subsection, the involved  
22 municipality or membership corporation or any attaching party may bring an  
23 action in the Business Court in accordance with the procedures for a  
24 mandatory business case set forth in G.S. 7A-45.4, and the Business Court  
25 shall have exclusive jurisdiction over such actions. The Business Court shall  
26 resolve such disputes consistent with the public interest and necessity.  
27 Nothing herein shall prevent a municipality or membership corporation from  
28 taking such action as may be necessary to remedy any exigent issue which is  
29 an imminent threat of death or injury to persons or damage to property.

30 (e) For purposes of this section, the term "communications service provider" means a  
31 person or entity that provides or intends to provide: (i) telephone service as a public utility  
32 under Chapter 62 of the General Statutes or as a telephone membership corporation organized  
33 under Chapter 117 of the General Statutes; (ii) broadband service, but excluding broadband  
34 service over energized electrical conductors owned by a municipality or membership  
35 corporation; or (iii) cable service over a cable system as those terms are defined in Article 42 of  
36 Chapter 66 of the General Statutes.

37 (f) The Business Court may adopt such rules as it deems necessary to implement its  
38 jurisdiction and authority under this section.

39 (g) Nothing herein shall preclude a party from bringing civil action in the appropriate  
40 division of the General Court of Justice seeking enforcement of an agreement concerning the  
41 rates, terms, and conditions for the use of or attachment to the poles, ducts, or conduits of a  
42 municipality or membership corporation."

43 **SECTION 2.** This act does not constitute certification of State regulation of pole  
44 attachments for purposes of section 224 of the Communications Act of 1934, as amended. If a  
45 court of competent jurisdiction determines that this act is tantamount to certification, this act  
46 shall become null and void.

47 **SECTION 3.** This act is effective when it becomes law.
