## GENERAL ASSEMBLY OF NORTH CAROLINA SESSION 2009

S

## **SENATE BILL 907**

	Short Title:	Water Resource Policy Act of 2009. (I	Public)
	Sponsors:	Senators Clodfelter; Albertson, Hartsell, and Swindell.	
	Referred to:	Agriculture/Environment/Natural Resources.	
		March 26, 2009	
1			
2		A BILL TO BE ENTITLED	
3	AN ACT TO	ENACT THE WATER RESOURCE POLICY ACT OF 2009.	
4		Assembly of North Carolina enacts:	
5			
6	PART I. DE	ECLARATION OF POLICY	
7	~-		
8		ECTION 1. Article 38 of Chapter 143 of the General Statutes is amend	led by
9	U	v section to read:	
10		. Declaration of policy.	
11		owing principles constitute the water resources policy of the State	
12		re and judicial decisions regarding water use and allocation by the Sta	
13	-	odivisions, and units of local government shall be governed by these principle	
14	<u>(1</u>		
15		resource owned by the State in trust for the public and subject	
16		sovereign power of the State to plan, regulate, and control the with	
17		and use of those waters, under law, in order to protect the public l	
18 19		safety, and welfare by promoting economic growth, mitigating the h	
20		<u>effects of drought, resolving conflicts among competing water</u> achieving balance between consumptive and nonconsumptive uses of	
20		encouraging conservation, protecting ecological integrity, and enhanci	
22		productivity of water-related activities.	ing the
23	<u>(2</u>	± •	rticle
24	<u>\</u> 2	the State undertakes, by permits and other steps authorized by la	
25		allocate the waters of the State among users in a manner that fosters ef	
26		and productive use of the water supply of the State in a sustainable n	
27		in the satisfaction of economic, environmental, and other social	
28		whether public or private, with the availability and utility of water	-
29		extended with a view to preventing water from becoming a limiting fa	
30		the general improvement of social welfare.	
31	<u>(3</u>		rovide
32		legal security for water rights within the constraints provided in this A	
33		this Article establishes a system of permits that makes a water right a	
34		of legal record entitled to legal protection. The State shall provide proc	edural
35		protection and fairness to parties to disputes over water rights through	public
36		proceedings on the allocation or modification of water rights, n	naking

available and encouraging formal and informal proc resolution, and encouraging alternative dispute resolution Protection of instream flows and groundwater levels. agencies, subdivisions, and persons residing or doing b shall preserve flow regimes and groundwater levels in a necessary to protect their physical, chemical, and eco	<u>1 mechanisms.</u> – The State and its
resolution, and encouraging alternative dispute resolution Protection of instream flows and groundwater levels. agencies, subdivisions, and persons residing or doing b shall preserve flow regimes and groundwater levels in necessary to protect their physical, chemical, and eco	<u>1 mechanisms.</u> – The State and its
agencies, subdivisions, and persons residing or doing b shall preserve flow regimes and groundwater levels in necessary to protect their physical, chemical, and eco	
shall preserve flow regimes and groundwater levels in necessary to protect their physical, chemical, and eco	main and in the State
necessary to protect their physical, chemical, and eco	usmess in the State
	all water sources as
	logical integrity by
reserving the appropriate portion of surface waters f	
seeking a long-term balance between the amount of grou	undwater withdrawn
from each aquifer or growth area and the amount of wa	ter recharged to the
aquifer or growth area; and by authorizing additional	protections of the
waters of the State.	-
Integration with water quality and adaptation of plans and	d hydrologic models

transfers."	actor of interbasili
)	<ul> <li>integration with water duality and adaptation of plans and to establish water budgets. – The State shall coordina regulations, and decisions pertaining to water alld pertaining to water quality, and shall adapt and update p models to ensure that actual and projected water consure plus the water needed for instream uses does not exceed. The State shall conserve the waters of the State through is by encouraging private efforts to conserve water and avo Pricing water to cover costs fully. – The State shall enfunding and oversight of local government and utility firr priced to fully cover the costs of its capture, treat collection, scarcity, and reuse, including the mainted replacement of water infrastructure, rather than being prilow as possible.</li> <li>Efficient and equitable allocation during shortfalls. – exercise of its sovereign police power to protect the p waters of the State, undertakes to provide, through this strategy to allocate available water efficiently and equater shortage or water emergency.</li> <li>Reasonable use requirement. – No person shall make at of the State except insofar as the use is reasonable as det this Article. No person using the waters of the State shall injury to other water uses made pursuant to valid water whether the injury relates to the quality or the quantactivity causing the injury.</li> <li>No prohibition of use based on location of use. – Uses State on nonriparian or nonoverlying land are lawful a consideration with uses on riparian or overlying land if or judicial proceeding relating to the allocation, withdra or to the modification of a water right. Nothing in the construed to authorize access to the waters of the State to make a nonriparian or nonoverlying use apart from available to that person.</li> <li>Regulating interstate and interbasin water transfers to access of a regional basis. – The State shall maintain the waters of supplying water requirements within the State and within origin and, under appropriate cincurstances, for out-of-basin transportatio</li></ul>

1 2	PART II. WAT	ER WITHDRAWAL PERMITS AND ALLOCATIONS
3 4	SECT	<b>TON 2.1.</b> G.S. 143-350 reads as rewritten:
5	"§ 143-350. Defi	
6	As used in thi	
7	(1)	<u>"Approved basinwide hydrologic model" means a basinwide hydrologic</u>
8	<u>(1)</u>	model adopted by the Commission pursuant to G.S. 143-355.19.
9	(1)(1a	<u>)</u> "Commission" means the Environmental Management Commission.
10	(1) <u>(1a</u> (1b)	<u>"Consumptive use" has the same meaning as in G.S. 143-215.21.</u>
11	(10) (2)	"Department" means the Department of Environment and Natural Resources.
2	(2) (2a)	"Ecological integrity" means the ability of a living system to support and
3	<u>(2a)</u>	maintain a balanced, integrated, adaptive community of organisms having a
4		species composition, diversity, and functional organization comparable to
5		that of the natural habitat and, when subject to disruption, to recover and
16		continue to provide the natural goods and services that normally accrue from
17		the system. "Ecological integrity" includes the biological, chemical, and
8		physical components of a living system.
19	(3)	"Essential water use" means the use of water necessary for firefighting,
20	$(\mathbf{J})$	health, and safety; water needed to sustain human and animal life; and water
20		necessary to satisfy federal, State, and local laws for the protection of public
22		health, safety, welfare, the environment, and natural resources; and a
23		minimum amount of water necessary to maintain the economy of the State,
24		region, or area.
25	(3a)	"Groundwater resource" means any water flowing or lying under the surface
26	<u>(5a)</u>	or contained within an aquifer.
20 27	<u>(3b)</u>	"Historical withdrawal" means the highest actual daily withdrawal made by
28	(50)	<u>a water withdrawer from January 1, 2006, to January 1, 2009.</u>
29	(4)	"Large community water system" means a community water system, as
30	()	defined in G.S. 130A-313(10), that regularly serves 1,000 or more service
31		connections or 3,000 or more individuals.
32	(4a)	"Nonconsumptive use" has the same meaning as in G.S. 143-215.21.
33	$\frac{(1a)}{(4b)}$	"Permit holder" means a person that is authorized under this Article to
34	<u>(10)</u>	withdraw water from a surface water resource or a groundwater resource.
35	<u>(4c)</u>	"Person" means any individual, firm, partnership, association, public or
86	<u>(10)</u>	private institution, municipality or political subdivision, governmental
37		agency, and private or public corporation organized or existing under the
88		laws of this State or any other state or country. For purposes of determining
		thresholds for withdrawal permitting under this Article, "person" includes
0		any person related as parent or affiliate. "Parent" has the same meaning as in
41		17 Code of Federal Regulations § 240.12b 2 (1 April 1996 Edition).
12		"Affiliate" has the same meaning as in 17 Code of Federal Regulations §
13		240.12b 2 (1 April 1996 Edition).
14	(4d)	"Prior allocation" means a right of withdrawal under G.S. 143-215.44, a
15	<u>(10)</u>	permitted withdrawal right under G.S. 143-215.15, or an interest in federal
6		storage projects owned by applicants or permittees under G.S. 143-354.11.
7	(4e)	"Surface water resource" means any lake, pond, river, stream, creek, run,
8	<u>()</u>	spring, or other water flowing or lying on the surface.
19	(5)	"Unit of local government" means a county, city, consolidated city-county,
50	(-)	sanitary district, or other local political subdivision or authority or agency of
51		local government.
-		

General A	sseml	oly of North Carolina	Session 2009
	(6)	"U.S. Drought Monitor" means the mareas of drought using the followid D1-Moderate, D2-Severe, D3-Extreme Drought Monitor is developed and means weather Facility, the Climate Prediction Center, and the National Drought Martine United States Geological Survey, the the Climate Diagnostics Center, the climate Diagnostics Center, the climate Diagnostics Center, the climate shortage emergency" means prolonged drought, contamination of infrastructure, or other unforeseen cause	ng categories D0-Abnormally Dry, ne, and D4-Exceptional. The U.S. maintained by the Joint Agricultural on Center, the National Climatic Data itigation Center with input from the National Water and Climate Center, the National Weather Service, state e agencies. a water shortage resulting from the water supply, damage to water
		public health, safety, and welfare or to	the environment."
		FION 2.2. Article 38 of Chapter 143 of	f the General Statutes is amended by
U		ections to read:	
		Certain water withdrawals unlawful wi	
<u>(a)</u>		Withdrawal Permit Required. – Except	
		withdraw water from the waters of t	
	-	nit under this Article from the Department rms and conditions, and rules established	· · ·
(b)		$\Delta$ permit shall not be required pu	•
		e waters of the State if the withdrawal i	
		ur period. To calculate the amount of wi	
		nt to this section, the Department shall	
		a single use or for related uses as a single	
(c)		Withdrawal Limit. – A water withd	
withdrawa	•	based on inflows, seasons, and other	-
approved	basinw	ide hydrologic model to be significant	factors in meeting the water resource
policies se	t out in	<u>n G.S. 143-352.</u>	
<u>(d)</u>	-	ntary Permit. – A person not required	-
		n may voluntarily apply for and obtain a v	
		s, terms, and conditions as for other	water withdrawal permits obtained
pursuant to			
<u>(e)</u>		in Prior Acts Not Factors for Considerat	± ±
		l permit has acquired property for the put	• • • •
		draw or use water or has undertaken correction of the second seco	
		beeding relating to the application or p	-
	-	g to the application or permit. Prior acqui	
		s a voluntary risk assumed by the application	
		e of the land or of the investment in fa	
		terms and conditions less favorable than	-
	-	Vater withdrawal permits.	
<u>(a)</u>		Withdrawal Permits The Department	t shall issue water withdrawal permits
as provide	d in th	is section for water withdrawals in river	basins for which approved hydrologic
		n adopted by the Commission.	_
<u>(b)</u>		cation. – An application for a water with	ndrawal permit shall contain all of the
following			
	<u>(1)</u>	The name and address of the applicant	
	<u>(2)</u>	The amount of water to be withdrawn	
		of the daily, monthly, seasonal, and and	nual mean and beak withdrawals.

	General Assemb	oly of North Carolina	Session 2009
1	(3)	The place and source of the withdrawal, including the	e latitude and longitude.
2	$\overline{(4)}$	The place, nature, and amount of the use of water.	
3	(5)	A classification of the uses of the withdrawn wa	ater as consumptive or
4		nonconsumptive.	±
5	<u>(6)</u>	The place and amount of return flows of withdrawn	water, including daily,
6	<u></u>	monthly, seasonal, and annual mean and peak return	
7	<u>(7)</u>	An estimate of the overall consumptive use of water f	
8	$\overline{(8)}$	The anticipated effects, if any, of the withdrawal of	
9		uses of the same water resource.	<u> </u>
0	<u>(9)</u>	A list of persons known by the applicant to have exist	ting or proposed uses of
1	<u></u>	the same water resource.	
2	(10)	The impact of the proposed withdrawal on other w	vater resources that are
3	<u></u>	hydrologically interconnected with the water so	
4		withdrawal is to be made.	
5	(11)	The operating capacity of any existing withdrawal s	vstem and the effect of
6	<u>,,</u>	the proposed withdrawal on the existing withdrawal s	•
7	(12)	Any land acquisition, equipment, energy consumption	
8	<u> </u>	resiting of any existing community, facility, right-o	
9		will be required by the withdrawal.	
0	<u>(13)</u>	The total anticipated costs of any construction related	to the withdrawal.
1	(14)	A list of all federal, State, or local approvals, per	
2	<u>,,</u>	authorizations required for the water withdrawal s	
3		system, or any other component of or system	-
4		withdrawal.	
5	(15)	A statement of whether and how the withdrawal	will comply with all
6		applicable plans and strategies for the use, manager	<b>±</b> •
7		the waters of the State and related land resources.	*
8	<u>(16)</u>	The planning status and estimated timetable for	the completion of the
9		proposed project.	
0	<u>(17)</u>	A description of alternative means for satisfying t	he applicant's need for
1		water if the requested permit is denied or modified.	
2	<u>(18)</u>	A description of any water conservation or efficience	y efforts that have been
3		or are planned to be implemented that are related to the	ne withdrawal.
4	<u>(19)</u>	For a withdrawal by a local government or large com	<u>nmunity water system, a</u>
5		copy of the most recent local water supply plan	n prepared pursuant to
6		<u>G.S. 143-215.119.</u>	
7	<u>(20)</u>	The amount of any historical withdrawal of water or i	interim allocation.
8	<u>(21)</u>	Any other information requested by the Department.	
9	(c) Prior	to making a permit decision, the Department shall	publish a notice of the
0	permit application	on once each week for four consecutive weeks in a	newspaper of general
1	circulation in eac	ch river basin that would be affected by the withdrawal	; publish a notice of the
2		n in the North Carolina Register; and provide individu	
3		nit of State or local government with regulatory author	-
4	-	rson holding a permit under this section or under	
5		nation System for the water resource from which the wi	
6		indicate the water resource from which withdrawal is t	
7		ne withdrawal, and the uses to be made of the withdraw	
8	* *	application under this section may be provided by a no	<b>•</b> • • •
.9	*	eview by the Department in a river basin. Any personal	•
50	comments to the	Department on any application within 45 days of the pu	ublication of the notice.

	General Assembly of North Carolina Session 2009
1	(d) If the Department determines that an application for a water withdrawal permit
2	meets the requirements for a withdrawal under this Article, the Department shall issue the
3	water withdrawal permit accompanied by a written statement of any permit terms and
4	conditions. If the Department determines that an application for a water withdrawal permit fails
5	to meet the requirements for a withdrawal under this Article, the Department shall deny the
6	application, and the application shall be returned to the applicant accompanied by a written
7	statement of the reasons for the denial.
8	"§ 143-355.12. Establishment of river basin planning organizations.
9	The General Assembly may establish a river basin planning organization to plan for and
10	manage water resource supply and demand in the river basin or a portion of the river basin in
11	order to prevent or eliminate overallocation. A river basin planning organization may include
12	representatives of water systems, permitted or allocated water withdrawers, environmental
13	advocacy groups, wildlife advocacy groups, State agencies, local governments, and other
14	entities with significant operations, activities, or interests related to the water resources of the
15	river basin. Funds for the staffing and operation of a river basin planning organization shall be
16	provided by an annual payment from each member that withdraws water. The amount of
17	payment by a member shall be based on the amount of water withdrawn by that member.
18	Members of a river basin planning organization that do not withdraw water shall not be
19 20	assessed a payment to participate in the organization. Votes shall be apportioned equally among
20 21	the members of the organization. "§ 143-355.13. Water withdrawal permits for overallocated river basins.
$\frac{21}{22}$	(a) Determination of Overallocation. – A river basin or portion of a river basin is
22	overallocated if both:
24	(1) An approved hydrologic model demonstrates or projects that the river basin
25	or portion of the river basin does not or will not have sufficient available
26	daily yield to meet the needs of water withdrawers and instream water uses
27	in accordance with the policies set out in G.S. 143-215.350.1 at any time
28	within the next 40 years.
29	(2) More than one interim allocation or permitted withdrawal is projected to
30	have insufficient water to meet its present and future demands for more than
31	seven consecutive days in two or more years and the projected shortfalls
32	cannot be demonstrated to be due to the failure of the approved hydrologic
33	model to consider alternative sources of water that are allocated or permitted
34	and legally available to the system with a projected shortfall.
35	(b) Determination of Available Daily Yield. –
36	(1) Surface water. – The available daily yield of a surface water resource is the
37	amount of water that can be withdrawn at a given location without violating
38	the physical or chemical integrity of the water source or the ecological
39	integrity of the river basin in which the water source is located and without
40	impeding other allocated or permitted withdrawals in the river basin. To
41	determine the available daily yield of a surface water resource, the
42 43	Department shall apply all of the following assumptions to the approved hydrologic model for the river basin in which the surface water resource is
43 44	located:
44	
45 46	<u>a.</u> <u>Flow years with inflows at least as low as the lowest recorded</u> historical flows.
47	b. Return flows no greater than currently permitted by the Department
48	or certified by the Department to be permittable.
49	c. <u>High-growth assumptions for withdrawals, including any growth</u>
50	assumptions provided by water systems in a local water supply plan.
-	<u> </u>

	General Ass	embly of North Carolina	Session 2009
1	<u>(2</u>	2) Groundwater. – The available daily yield of a groundw	ater resource is an
2		estimate by the Department of the volume of water that	can be withdrawn
3		from the resource for a stated unit of time without impair	iring the long-term
4		balance between the amount of groundwater withdrawn	and the amount of
5		water recharged.	
6	<u>(3</u>	b) Other factors. – Determinations of available daily yie	eld for surface or
7		groundwater resources shall include consideration of	f the connections
8		between surface and groundwater resources in a given geo	graphic area.
9	<u>(c)</u> <u>W</u>	Then the Department determines that a river basin or portion	of a river basin is
10	overallocated	l, water in that river basin or portion of a river basin shall be all	ocated as provided
11	in this section	n. The Department shall choose the procedure for addressing or	verallocation based
12		ination of the most efficient and equitable means of preventing	
13	overallocatio	n. Holders of interim allocations under this act may continue to	make withdrawals
14	associated wi	ith those allocations until and unless reductions are ordered und	er this Article. In a
15		nat is overallocated, no person may make a new withdrawal, in	
16		eyond the level previously permitted or allocated, extend wate	
17	increase the i	number of water or sewer connections until the Department cert	tifies that the water
18		in the basin have implemented measures adequate to ensure that	at the river basin or
19	-	iver basin is no longer overallocated under this section.	
20		lodification of Allocations by the Department. –	
21	<u>(1</u>		
22		overallocation according to the following priorities and	<u>d in the following</u>
23		order of preference:	
24		<u>a.</u> <u>Prior allocations.</u>	
25		b. <u>Historical withdrawals.</u>	
26		c. Expanded withdrawals that propose expansion	
27		imposed by past capital investment in treatment	
28		will be operated in accordance with the standar	<u>ds for approval of</u>
29		permits under this Article.	
30		d. <u>New or expanded withdrawals that clearly</u>	
31		demonstrate attainment of the standards for ap	proval of permits
32		under this Article.	
33	(2	e. <u>All other essential water uses.</u>	
34	<u>(2</u>		-
35		may determine whether applications are competing b	
36 37		applications by periods of time and by processing appli	
37 38		issue permits on a basinwide schedule. Within each pr	
38 39		uses are to be preferred that maximize the reasonal	
39 40		Voluntary efficiency and conservation activities implemented actions taken pursuant to this activities

General Ass	sembl	y of North Carolina	Session 2009
(g) E	Extent	of Permit Termination When the Department terminate	s a permit under
		his section, it may terminate it in whole or in part, depending	
		s wasted or not withdrawn or used, or the extent to which the	
		with the terms or conditions of the permit.	- <u>-</u>
		er by Modification. – A permit may be transferred by the pe	ermittee to a new
		r only if the permit has been modified, revoked and reiss	
		e to identify the new permittee and incorporate such other	
may be nece			<u>i</u>
		Generally Nontransferable Unless otherwise authorized	by this section.
		permits shall not be transferred.	
		vater withdrawal permit fees.	
		o Cover Costs. – Annual fees and application fees for v	vater withdrawal
		m allocations for historical withdrawals shall not exceed the	
		the water withdrawal permitting program, including the	
		s, monitoring, and enforcement.	<u> </u>
• •		Fees. – Annual fees for water withdrawal permits and in	terim allocations
shall be as fo		-	
()	1)	For a withdrawal of 100,000 gallons per day to 499,999 gal	llons per day, the
_		annual fee shall be seven hundred fifty dollars (\$750.00).	
(2	2)	For a withdrawal of 500,000 gallons per day to 999,999 gal	llons per day, the
_		annual fee shall be one thousand dollars (\$1,000).	• •
(.	3)	For a withdrawal of 1,000,000 gallons per day to 4,999,999	gallons per day,
		the annual fee shall be two thousand five hundred dollars (\$	
(4	<u>4)</u>	For a withdrawal of 5,000,000 gallons per day to 9,999,999	gallons per day,
		the annual fee shall be five thousand dollars (\$5,000).	
<u>(</u>	5)	For a withdrawal of 10,000,000 gallons per day to 49,999	9,999 gallons per
		day, the annual fee shall be seven thousand five hundred dol	llars (\$7,500).
<u>((</u>	<u>6)</u>	For a withdrawal of 50,000,000 gallons per day to 99,999	9,999 gallons per
		day, the annual fee shall be ten thousand dollars (\$10,000).	
<u>(</u>	<u>7)</u>	For a withdrawal of 100,000,000 gallons per day to 499,999	9,999 gallons per
		day, the annual fee shall be fifteen thousand dollars (\$15,000	<u>0).</u>
(8	8)	For a withdrawal of 500,000,000 gallons per day to 999,999	9,999 gallons per
		day, the annual fee shall be twenty thousand dollars (\$20,00	<u>0).</u>
<u>(</u>	<u>9)</u>	For a withdrawal of 1,000,000,000 gallons per day or mor	re, the annual fee
		shall be twenty-five thousand dollars (\$25,000).	
<u>(c)</u>	Genera	al Permit Fee The annual fee for a general water wa	ithdrawal permit
established p	oursua	ant to G.S. 143-354(f) shall be two hundred fifty dollars (\$250	0.00).
<u>(d)</u> <u>P</u>	roces	sing Fees. – Processing fees for water withdrawal perm	nits and interim
allocations s	hall b	e as follows:	
<u>(</u> )	1)	The application processing fee for a withdrawal permit ren	
		allocation for a historical withdrawal shall be one thousand of	dollars (\$1,000).
(2	2)	The application processing fee for a new or expanded with	drawal or interim
		allocation shall be five thousand dollars (\$5,000).	
<u>(</u> .	<u>3)</u>	The application processing fee for a general permit shall	be two hundred
		fifty dollars (\$250.00).	
		dministrative procedures for water withdrawal permits.	
		v of Permit Decisions If the Department determine	
	-	t application fails to meet the requirements of this Article	* *
		nd the application shall be returned to the applicant accompa	
		easons for its denial. Unless the permit applicant contests a	
the proposed	d perr	nit shall become effective on the date set in the proposed	permit. A person

	General Assembly of North Carolina	Session 2009
1	who is dissatisfied with a decision of the Department concerning that user's o	or another user's
2	permit application or permit may commence a contested case under G.S. 150B-2	<u>23.</u>
3	(b) Review of Technical Decisions. – In any contested case or judicia	l proceeding in
4	which the validity of an approved hydrologic model or a component of an appro-	oved hydrologic
5	model, including data, algorithms, calculations of available daily yield, over	rallocated river
6	basins, estimates of water required for instream purposes, and estimates	for ecological,
7	chemical, and biological integrity, the administrative law judge or court sh	all defer to the
8	decision of the Department so long as the decision is not arbitrary or capricious.	
9	(c) <u>Review River Basin Planning Organization Decisions. – Judi</u>	cial review of
10	decisions and deliberations of a river basin planning organization established un	nder this Article
11	shall be taken only by a contested case proceeding under G.S. 150B-23 that cha	llenges the final
12	decision of the Department regarding a permit application or applications	. Deliberations,
13	decisions, and reports of a river basin planning organization established under t	his Article shall
14	be considered nonfinal agency action that is not ripe for judicial review.	
15	" <u>§ 143-355.19. Basinwide hydrologic models.</u>	
16	(a) <u>Basinwide Hydrologic Model. – The Department shall develop an</u>	
17	basinwide hydrologic model for each of the major river basins in the State	as identified in
18	G.S. 143-215.22G. Each basinwide hydrologic model shall:	
19	(1) Include surface water resources within the river basin	-
20	resources within the river basin to the extent known by t	•
21	transfers into and out of the river basin that are required t	
22	under G.S. 143-215.22H, withdrawals permitted under this	
23	estimate of withdrawals that are exempt from the permittin	
24	ecological flow and other instream flow requirements, proje	
25	withdrawals, and an estimate of return flows within the river	
26	(2) <u>Be designed to predict the flows and available daily yield</u>	of each surface
27	water resource within the basin.	
28	(3) <u>Be based on the best science and modeling methodol</u>	ogy practically
29	<u>available.</u>	
30	(4) Be based solely on data and algorithms that are public reco	rds and open to
31	public review and comment.	nitial hasimutida
32 33	(b) Adoption. – The Commission shall adopt rules to approve each in hydrologic model developed by the Department pursuant to this section a	
33 34	basinwide hydrologic model.	<u>s the approved</u>
34 35	(c) Update Due to Changed Circumstances. – The Department sh	all ravisa aach
35 36	basinwide hydrologic model to reflect new data on water resources, withdraw	
30 37	and uses, including, but not limited to, inflow data, changes in water quality dat	
38	changes in groundwater standards, local water supply plans, instream fl	
39	ecological integrity, and other technical and scientific information collected un	
40	A revision made pursuant to this subsection is not a rule under G.S. 150B-2. T	
41	shall adopt rules to provide for scientific and technical review of and public of	
42	revisions."	
43	<b>SECTION 2.3.</b> G.S. 143-354 is amended by adding a new subsection	on to read:
44	"(f) Water Withdrawal Permits. – The Commission shall adopt any rul	
45	implement the water withdrawal permit program established by this Article. T	
46	shall develop general water withdrawal permits for categories of withdrawers w	
47	is intermittent or onetime. General water withdrawal permits developed p	
48	subdivision may contain reporting, low-flow, and other permit condition	
49	individual permits."	
50	<b>SECTION 2.4.</b> G.S. 143-355 is amended by adding a new subsection	on to read:

	General Assemb	ly of N	orth Carolina	Session 2009
1	" <u>(b2)</u> Water	Withd	rawal Permits. – The Department shal	l issue water withdrawal permits
2	as provided in the	his Art	icle. The Department shall develop,	in consultation with the North
3			rces Commission, the United States F	
4			es Service, ecological criteria that will	Il protect the ecological integrity
5			ach river sub-basin in the State."	
6			<b>.5.</b> G.S. 143-355.6 is amended by add	6
7			y may assess a civil penalty of not	
8			gainst any person who violates any	
9	-	-	l pursuant to the Article. The amount $c$	
10 11			<u>G.S. 143B-282.1(b). The Secretary m</u>	ay remit a civil penalty based on
11	the factors set out	<u>, III (), 5</u>	<u>. 143B-282.1(c)(1).</u> "	
12	PART III INTE	FRIM	ALLOCATIONS	
13 14			ALLOCATIONS

	General Assembly of North Carolina Session 2009
1	General Assembly affirms the State's ultimate responsibility for the preservation and
2	development of these resources in the best interest of all its citizens and declares the prudent
3	utilization of these resources to be essential to the general welfare."
4	SECTION 4.3. G.S. 143-214.13(b) reads as rewritten:
5	"(b) Within the meaning of this Part "a capacity use area" is one where the Commission
6	finds that the aggregate uses of groundwater or surface water, or both, in or affecting said area
7	(i) have developed or threatened to develop to a degree which requires coordination and
8	regulation, or (ii) exceed or threaten to exceed, or otherwise threaten or impair, the renewal or
9	replenishment of such waters or any part of them.them, or (iii) have created or are projected to
10	create an overallocated river basin, as determined pursuant to G.S. 143-215.13."
11	<b>SECTION 4.4.</b> G.S. 143-215.22H(b) is repealed.
12	SECTION 4.5. G.S. 162A-20, 162A-21, 162A-22, 162A-23, 162A-24, and
13	162A-25 are repealed.
14	<b>SECTION 4.6.</b> Promote Public Access to Water and Water Funding Information. –
15	The Department of Environment and Natural Resources, in conjunction with the North
16	Carolina League of Municipalities, the North Carolina Association of County Commissioners,
17	and interested private water systems, and with the assistance of the Institute for the
18	Environment at the University of North Carolina at Chapel Hill, shall:
19	(1) Identify all of the water-reporting requirements of the State and of the
20	United States Environmental Protection Agency.
21	(2) Provide greater public access to water and water funding information.
22	<ul><li>(3) Develop and implement a plan to consolidate water data into one or more</li></ul>
23	comprehensive Water System Reports to the State and for the public.
24	<b>SECTION 4.7.</b> Continue Study of Water Allocation Issues. – The Environmental
25	Review Commission may continue to study those topics identified for further research and
26	study in the 2008 Report of the Water Allocation Study to the Environmental Review
27	Commission.
28	SECTION 4.8. Financial Review of Public Water Supply and Wastewater
29	Systems. – The Department of Environment and Natural Resources and the Local Government
30	Commission in the Office of State Treasurer shall monitor the revenues and costs of public
31	water supply and wastewater systems in the State. If the Department and Commission find that
32	a public water supply or wastewater system fails on an annual basis to raise revenue sufficient
33	to cover the costs associated with the system, including the costs of maintenance and repair and
34	replacement of treatment and distribution or collection infrastructure, the Department and
35	Commission shall request a written explanation for the revenue shortfall from the governing
36	board of the system. The governing board of the system shall respond to the request within 90
37	days and shall include in the response the measures that it has agreed to implement to ensure
38	that system revenues cover system costs.
39	<b>SECTION 4.9.</b> Water Efficiency Report. – The Division of Pollution Prevention
40	and Environmental Assistance in the Department of Environment and Natural Resources, other
41	appropriate divisions in the Department, and the Department of Agriculture and Consumer
42	Services shall report no later than April 1, 2010, on all of the following:
43	(1) The implementation of water efficiency measures required under Section 9
44	of S.L. 2008-143.
45	(2) The coordination of water efficiency audits and energy efficiency audits.
46	(3) The water efficiency standards and accomplishments of significant industrial
47	and agricultural water users in the State.
48	(4) Other water efficiency efforts that are being implemented in the State.
