GENERAL ASSEMBLY OF NORTH CAROLINA SESSION 2021

## S

## SENATE BILL DRS15210-MTa-85

| Short Title: | Redistricting County Cluster Process.          | (Public) |
|--------------|--|----------|
| Sponsors:    | Senators Clark and Woodard (Primary Sponsors). |          |
| Referred to: |  |          |

| 1  | A BILL TO BE ENTITLED   |
|----|---|
| 2  | AN ACT TO ESTABLISH A PROCESS FOR THE CREATION AND SELECTION OF                                       |
| 3  | COUNTY CLUSTER MAPS TO BE USED WHEN REVISING DISTRICTS FOR THE  |
| 4  | SENATE AND THE HOUSE OF REPRESENTATIVES FOLLOWING THE RETURN OF                                       |
| 5  | THE 2020 DECENNIAL CENSUS.  |
| 6  | Whereas, the United States Bureau of the Census intends to release the 2020 federal                   |
| 7  | decennial census apportionment counts to the President of the United States no later than April       |
| 8  | 30, 2021; and   |
| 9  | Whereas, the 2021 Regular Session of the General Assembly convened for the                            |
| 10 | 2021-2022 biennium on January 13, 2021; and   |
| 11 | Whereas, G.S. 163-132.1C requires that "[t]he State of North Carolina shall                           |
| 12 | participate in the 2020 Census Redistricting Data Program, conducted pursuant to P.L. 94-171,         |
| 13 | of the United States Bureau of the Census, so that the State will receive 2020 Census data by         |
| 14 | voting districts"; and  |
| 15 | Whereas, on March 31, 2020, the Census Redistricting and Voting Rights Data Office                    |
| 16 | completed Phase 2 of the 2020 Census Redistricting Data Program, entitled "The Voting District        |
| 17 | Project," which provides states the opportunity to submit their voting districts for inclusion in the |
| 18 | 2020 census redistricting data tabulations (P.L. 94-171, Redistricting Data File); and                |
| 19 | Whereas, the Secretary of Commerce intends to provide census results to each state's                  |
| 20 | governor and the officers or public bodies with responsibility for legislative redistricting no later |
| 21 | than September 30, 2021; and  |
| 22 | Whereas, the filing period for the Senate and the House of Representatives of the                     |
| 23 | General Assembly will begin December 6, 2021, and conclude December 17, 2021, for                     |
| 24 | candidates who are seeking their party's nomination in the March 8, 2022, primary; and                |
| 25 | Whereas, Sections 3(3) and 5(3) of Article II of the Constitution of North Carolina,                  |
| 26 | "the Whole County Provisions," as interpreted by the Supreme Court of North Carolina in               |
| 27 | Stephenson v. Bartlett, 355 N.C. 354, 562 S.E.2d 377 (2002), Stephenson v. Bartlett, 357 N.C.         |
| 28 | 301, 582 S.E.2d 247 (2003), Dickson v. Rucho, 367 N.C. 542, 766 S.E.2d 238 (2014), and                |
| 29 | Dickson v. Rucho, 368 N.C. 481, 781 S.E.2d 460 (2015), require that legislative districts be          |
| 30 | drawn within county clusters; and   |
| 31 | Whereas, in 2019, a team of mathematicians sponsored by Duke University released                      |
| 32 | a report entitled, "Optimal Legislative County Clustering in North Carolina," which revealed that     |
| 33 | multiple optimal county cluster maps for the Senate and the House of Representatives of the           |
| 34 | General Assembly would likely emerge from a given census population; and                              |

| General A    | ssemb          | oly Of North Carolina  | Session 2021          |
|--------------|----------------|--|-----------------------|
|              | Wher           | eas, in 2019, a team of mathematicians sponsored by Du   | ke University made    |
| publicly av  |                | e computer code that can be used to generate the total set   | -                     |
| maps; and    |                |  |                       |
| inaps, and   | Wher           | eas, the General Assembly must choose one cluster map fo   | r each chamber from   |
| among mu     |                | options for the purpose of decennially revising districts for  |                       |
| -            | -              | entatives of the General Assembly; and   | T the Senate and the  |
|              | -              | eas, the selection of a cluster map for revising districts for   | or the Senate and the |
| House of I   |                | entatives of the General Assembly has the potential to in  |                       |
|              |                | ture General Assemblies; and   | indence the partisan  |
| distribution |                | eas, objective criteria need to be established and used for se   | lecting one optimum   |
| cluster ma   |                | each chamber of the General Assembly from among the se   | • •                   |
| therefore,   |                | ach chamber of the General Assembly from among the sc  |                       |
| ,            | al Acc         | embly of North Carolina enacts:  |                       |
| The Ocher    |                | <b>FION 1.</b> For purposes of this act, the following definitions   | shall annly.          |
|              | (1)            | Census Bureau. – The United States Bureau of the Censu   |                       |
|              |                |  |                       |
|              | (2)            | Cluster. – A grouping of one or more counties that is cap  | Jable of containing a |
|              | (2)            | whole number of legislative districts.   | of four numbers and   |
|              | (3)            | Cluster code. – A shorthand cluster descriptor consisting  |                       |
|              |                | a colon (##:##). The first two spaces indicate the numbe   |                       |
|              |                | be contained in a cluster. The last two spaces indicate the  | e number of counties  |
|              | $(\mathbf{A})$ | that form a cluster.   |                       |
|              | (4)            | Cluster count. – The number of unique clusters in a clust  | -                     |
|              | (5)            | Cluster map. – A statewide map depicting a complete set  |                       |
|              |                | revising districts for the Senate or the House of Represent  | arives of the General |
|              | $(\mathbf{C})$ | Assembly.  |                       |
|              | (6)            | Cluster map set. – The total collection of optimur   | -                     |
|              |                | consideration prior to revising districts for the Senate   | and the House of      |
|              | ( <b>7</b> )   | Representatives of the General Assembly.   |                       |
|              | (7)            | Data from the 2020 decennial census. – Population data r   | -                     |
|              |                | redistricting that the Census Bureau is required to provid<br>RL 04 171 including the population of the State and po |                       |
|              |                | P.L. 94-171, including the population of the State and po  | pulation amounts for  |
|              | ( <b>0</b> )   | each county therein.   |                       |
|              | (8)            | Ideal cluster population. – The number determined by r   |                       |
|              |                | district population by the number of whole districts that of   | can be contained in a |
|              | (0)            | cluster.   | viding the number of  |
|              | (9)            | Ideal district population. – The number determined by div  | -                     |
|              |                | members in a plan into the population of the State as a  | eponed in the 2020    |
|              | (10)           | decennial census. Monocluster $(MC)$ A cluster that contains a single dis  | triat of the Sanata - |
|              | (10)           | Monocluster (MC). – A cluster that contains a single dis   |                       |
|              |                | the House of Representatives of the General Assembly $(50)$ of its ideal electron population. In a manual            | -                     |
|              |                | percent (5%) of its ideal cluster population. In a monoclu   |                       |
|              |                | boundary of the cluster and the district that it supports ar   |                       |
|              |                | measurable attributes, e.g., compactness and political p   | performance, for the  |
|              | (11)           | cluster and the district it contains are the same.   | ·····                 |
|              | (11)           | Optimum cluster map. – A cluster map that meets the requ   |                       |
|              |                | 3(3) and 5(3) of Article II of the Constitution of North Ca  | -                     |
|              |                | by the Supreme Court of North Carolina, including the  | -                     |
|              |                | cluster within the map may deviate from the ideal cluster  | population by more    |
|              | (10)           | or less than five percent (5%).  | (1 TT - C             |
|              | (12)           | Plan. – A plan for revising districts for the Senat  | e or the House of     |
|              |                | Representatives of the General Assembly.   |                       |

|          | General Assemb    | ly Of North Carolina  | Session 2021            |
|----------|-------------------|---|-------------------------|
| 1        | (13)              | Polycluster (PC). – A cluster that contains two or more   | districts of the Senate |
| 2        |                   | or the House of Representatives of the General Assem  | bly and is within five  |
| 3        |                   | percent (5%) of its ideal cluster population. In a polyc  | luster, the geographic  |
| 4        |                   | boundary of the cluster and the boundaries of the distr   | icts contained therein  |
| 5        |                   | are not the same. All measurable attributes of a polyclus   | • •                     |
| 6<br>7   |                   | and political performance, may differ from those of therein.  | he districts contained  |
| 8        | (14)              | Super cluster. – A collection of clusters formed from a   | subset of counties in   |
| 9        | ()                | which the counties can be combined in alternate ways  |                         |
| 10       |                   | complete sets of county clusters. A super cluster may co  |                         |
| 11       |                   | polyclusters, or both.  |                         |
| 12       | SECT              | <b>TON 2.</b> For the purpose of establishing cluster maps to   | serve as the basis for  |
| 13       | the apportionmer  | nt of seats in the Senate and the House of Representation   | atives of the General   |
| 14       | Assembly follow   | ing the return of the 2020 decennial census, in order t   | o nominate and elect    |
| 15       | members of the ty | wo chambers, the following process shall be used:   |                         |
| 16       | (1)               | Within 14 days of the date on which the Census Burea  | 1                       |
| 17       |                   | the 2020 decennial census to the State, the Legislative   |                         |
| 18       |                   | provide that data to the State Board of Elections. From   |                         |
| 19<br>20 |                   | Board shall develop a cluster map set. The State Board  | •                       |
| 20<br>21 |                   | delegate all or a portion of the responsibility of develop<br>to the Department of Mathematics at Duke University |                         |
| 21<br>22 |                   | to the Department of Mathematics at Duke Univers<br>Government at the University of North Carolina at Cha         | •                       |
| 22       | (2)               | Within 28 days of the date on which the Census Burea  | E                       |
| 23<br>24 | (2)               | the 2020 decennial census to the State, the Executive   | 1                       |
| 25       |                   | Board of Elections (Executive Director) shall provide   |                         |
| 26       |                   | obtained pursuant to subdivision (1) of this section,   | -                       |
| 27       |                   | Tempore of the Senate, the Speaker of the House of  |                         |
| 28       |                   | Principal Clerk of the Senate, and the Principal Cle  | 1                       |
| 29       |                   | Representatives.  |                         |
| 30       | (3)               | Within 29 days of the date on which the Census Burea  |                         |
| 31       |                   | the 2020 decennial census to the State, the Principal Cl  |                         |
| 32       |                   | the Principal Clerk of the House of Representatives sha   |                         |
| 33       |                   | cluster map set to the members of the Senate  |                         |
| 34<br>25 |                   | Representatives, including the chairs of any standing   | or select redistricting |
| 35<br>36 | (A)               | committee.<br>Within 20 days of the data on which the Consus Pures  | n maridaa data fram     |
| 30<br>37 | (4)               | Within 30 days of the date on which the Census Burea<br>the 2020 decennial census to the State, the chair or cha  | -                       |
| 38       |                   | tasked with reapportioning districts for the Senat  | -                       |
| 39       |                   | Representatives shall post the cluster map set on the w   |                         |
| 40       |                   | Assembly for comment and review by the public. Comm   |                         |
| 41       |                   | for a period of at least five days, and the committee or  |                         |
| 42       |                   | no action during that time.   |                         |
| 43       | (5)               | Within 37 days of the date on which the Census Burea  | au provides data from   |
| 44       |                   | the 2020 decennial census to the State, all com   | -                       |
| 45       |                   | reapportioning districts for the Senate and the House of  |                         |
| 46       |                   | General Assembly shall meet jointly for the purpose of  |                         |
| 47       |                   | public comments regarding the selection of a cluster map  | p from the cluster map  |
| 48       |                   | set provided by the State Board of Elections.   |                         |
| 49       | (6)               | When selecting a cluster map, no committee tasked   | 11 0                    |
| 50       |                   | districts for the Senate and the House of Representa  | atives of the General   |
| 51       |                   | Assembly shall consider the following factors:  |                         |

| Ge | neral Assembly Of | North Carolina   | Session 2021           |
|----|-------------------|--|------------------------|
|    | a.                | Incumbency protection. – The committee or make any effort to avoid pairing an incumbent nor the House of Representatives with anoth selecting a cluster map. | member of the Senate   |
|    | b.                | Partisan advantage The committee or comm   | ittees shall not make  |
|    |                   | any effort to favor one political party over another   | ther when selecting a  |
|    |                   | cluster map.   |                        |
|    | (7) The           | Executive Director shall ensure that each cluster m  | ap in the cluster map  |
|    | set p             | rovided to the General Assembly pursuant to su   | ubdivision (2) of this |
|    | secti             | on includes the following:   |                        |
|    | a.                | A notes section on each cluster map that identified  | es the total number of |
|    |                   | clusters, monoclusters, and polyclusters. Clu  | ister maps shall be    |
|    |                   | provided in Portable Document Format.  |                        |
|    | b.                | Shapefiles and block assignment files for each c   | luster map.            |
|    | с.                | A table for each cluster map that contains the   | he following data in   |
|    |                   | separate columns:  |                        |
|    |                   | 1. An identifying number for the cluster ma  | ap.                    |
|    |                   | 2. An identifier for each cluster.   |                        |
|    |                   | 3. A list of all counties in each cluster.   |                        |
|    |                   | 4. The cluster code for each cluster.  |                        |
|    |                   | 5. The population of each cluster.   |                        |
|    |                   | 6. The percentage by which the cluster   | varies from its ideal  |
|    |                   | cluster population.  |                        |
|    | SECTION           | <b>3.</b> This act is effective when it becomes law.   |                        |
