10 waters that are not yet polluted. The task of cleaning up polluted waters and protecting and
11 enhancing the State's water resources is multifaceted and requires different approaches,
12 including innovative pilot projects, that take into account the problems, the type of pollution,
13 the geographical area, and the recognition that the hydrological and ecological values of each
14 resource sought to be upgraded, conserved, and protected are unique.

15 It is the intent of the General Assembly that moneys from the Fund created under this
16 Article shall be used to help finance projects that specifically address water pollution problems
17 and focus on upgrading surface waters, eliminating pollution, and ~~protecting~~ protecting,
18 preserving, and conserving unpolluted surface waters, including enhancement or development
19 of urban drinking water supplies. It is the further intent of the General Assembly that moneys
20 from the Fund also be used to build a network of riparian buffers and greenways for
21 environmental, educational, and recreational benefits. It is lastly the intent of the General
22 Assembly that moneys from the Fund also be used to preserve lands that could be used for
23 water supply reservoirs. While the purpose of this Article is to focus on the cleanup and
24 prevention of pollution of the State's surface ~~waters~~ waters, ~~and~~ the establishment of a network
25 of riparian buffers and greenways, and the preservation of property for establishing clean water
26 supplies, the General Assembly believes that the results of these efforts will also be beneficial
27 to wildlife and marine fisheries habitats."
